

Autism Assessments in Gloucestershire

We are looking at people's experiences of the Autism Assessment Service; accessing the service, waiting for an assessment, the assessment process, the support and the outcomes for them. We want to find out what is good about the service and what could be improved.

We also want to find out if people with Autism have a good service from health and care services around the county that is tailored to their needs. If there are barriers or difficulties to using primary care, community care, hospital care or social care services then we will make recommendations about how these barriers can be removed and be clear about what adjustments people with Autism need to have.

You can arrange to talk to us by emailing us or phoning us through the details below:
